Experience

Expedia Group

SOFTWARE DEVELOPMENT ENGINEER II

London, England

March 2024 - September 2025

- Built and maintained high-performance Java and Scala microservices hosted on AWS to compute prices for multiple lines of business while ensuring high availability and reliability.
- Collaborated with cross-functional teams across the company to align engineering efforts with business goals, contributing to the evolution of the pricing platform through innovative solutions that supported new requirements and product expansions.
- Managed and optimized the core Pricing API using both REST and gRPC communication frameworks to ensure minimal latency and high availability across multiple availability zones.
- Designed and developed microservices to consume Kafka stream events, process the data and publish the results to an S3 bucket in AWS using the Netflix Hollow library for optimized data storage and retrieval.

Expedia Group

SOFTWARE DEVELOPMENT ENGINEER I

London, England

August 2022 - March 2024

- Completed two rotations within Expedia Group, contributing to two critical platform engineering teams.
- Data Lake Team: Managed and optimized data storage infrastructure for petabytes of business data, ensuring accessibility and reliability for analytics teams to drive data-informed decision-making.
- Pricing Team: Worked on the Pricing platform responsible for APIs that deliver quotes across multiple lines of business, including hotels and cars.
- Gained broad technical exposure to large-scale systems and platforms, ultimately choosing to continue as a permanent member of the Pricing team.

Side Projects

TooMuchStudy

CORE DEVELOPER

Dundee, Scotland

I built an iOS app with the SwiftUI framework that records study sessions duration and provides clear stats with charts and aggregated weekly/monthly data.

Extracurricular Activities

University of Dundee

STUDENT REP

Dundee, Scotland

As a Student Rep I collect student feedback through surveys and conversations and then meet on a weekly basis with staff members to discuss and implement improvements to the student experience at the University.

Peak Grooves Records

MUSIC PRODUCER

London, England

I produce music for a small record label.
